SUMMARY

Senior Frontend Engineer with **4+ years of experience** building high-performance ecommerce and marketing technology products with React, Next.js, Astro, and TypeScript. Currently contribute to **Personify**, a multichannel campaign platform for email, push, SMS, customer segmentation, and event-triggered journeys. Delivered **10+ storefront migrations**, a personalization layer that **doubled campaign revenue**, and an AI content engine that **reduced production time by 80%**. Focused on frontend architecture, web performance, accessibility, experimentation, and maintainable product systems.

EXPERIENCE

Senior Frontend Engineer, THG Ingenuity

Sep 2025 - Present

- **Build Personify**, a marketing technology platform for email, push, and SMS campaigns, customer segmentation, and event-triggered journeys.
- **Improved campaign creation** with email heatmaps, drafts, journey templates, email-builder features, a redesigned campaign experience, and an in-progress AI agent.
- **Made complex workflow journeys more reliable, intuitive, and maintainable** across multichannel campaign orchestration.
- **Protected major sale events** with RUM dashboards, synthetic checks, alerts, runbooks, load tests, and spike-protection strategies.
- Mentor junior engineers and collaborate with data, design, and marketing teams on product-driven features.

Software Engineer - Frontend, THG Ingenuity

May 2024 - Sep 2025

- **Migrated 10+ beauty and luxury storefronts** using React, Next.js, Astro, and TypeScript, improving TTFB, TTI, SEO, and maintainability.
- **Doubled personalized campaign revenue** by building a Google Tag Manager-integrated content-delivery layer and resolving legacy issues.
- **Modernized React 16 to React 18 and MUI Core v5**, replacing legacy class components with functional patterns.
- Built server-side data layers, SDK-style hooks, privacy-compliant fallbacks, edge caching, feature flags, experiment instrumentation, and dashboards.

Software Engineer / Associate Software Engineer, Coditas

Jul 2022 - May 2024

- **Built responsive React and Next.js applications** and reusable component systems with Tailwind CSS, MUI, Chakra UI, and styled-components.
- **Improved performance and cross-browser reliability** through code splitting, lazy loading, and automated testing with Jest and React Testing Library.
- Contributed to REST API integration, code reviews, CI/CD practices, and agile delivery across production web products.

PROJECTS

Personify Marketing Technology Platform

- **Improved campaign orchestration** with email heatmaps, drafts, journey templates, email-builder features, and a redesigned campaign experience.
- **Made multichannel workflows more reliable and maintainable** while developing an **AI agent** for the email builder.

VibeLabs AI Content Engine

- **Won the THG India AI Hackathon 2025** and **reduced content production time by 80%** with an LLM-powered ecommerce content engine.
- **Generated SEO product copy, personalized email campaigns, image edits, and advertisement videos** from guided workflows.

Hydrafacial

- **Built a geolocation-based store locator**, API-validated forms, and loyalty flows for customer discovery and engagement.
- Delivered privacy experiences and localized policy content across **29+ languages**.

EDUCATION

Master of Business Administration (MBA) , Information Technology NMIMS CDOE	<i>Jun 2026 - Jun 2028</i>
Bachelor of Engineering , Computer Engineering SNJB's KBJ College of Engineering, Chandwad	<i>Jun 2018 - Jun 2022</i> GPA: 9.14

SKILLS

Frontend & UI: React, Next.js, Astro, TypeScript, JavaScript, Tailwind CSS, SCSS, MUI, Chakra UI, styled-components

MarTech & Product: Campaign orchestration, customer segmentation, email builder, event-triggered journeys, personalization

Performance & Architecture: Core Web Vitals, SSR, SSG, edge rendering, island architecture, caching, code splitting, technical SEO

Analytics & Experimentation: Google Tag Manager, A/B testing, feature flags, RUM, synthetic monitoring

Testing & Accessibility: Jest, React Testing Library, accessibility testing, cross-browser testing

Platforms, Delivery & AI: REST APIs, Git, GitHub, CI/CD, Jira, Agile, GitHub Copilot, ChatGPT, Claude, Codex, prompt engineering

State & Forms: Redux, Recoil, React Hook Form, Formik, Yup
